

LIKE VOICE FROM GRAVE.

Statement of Pennell Given
to Public.

Inquest Throws No New Light on
the Budick Murder.

Pennell Purposely Plunged
Down Embankment Also
Remains a Question.

(BY THE ASSOCIATED PRESS-P.M.)
BUFFALO, April 10.—The evidence given today to the inquest into the death of Arthur R. Pennell and Mrs. Pennell, will not help the authorities in any way to a solution of the murder mystery. Whether the tragedy at Gehrs stone quarry on March 10, in which Pennell was killed and Mrs. Pennell was fatally injured, was due to an accident or design was not proved.

Thomas Pennell, who has acted as attorney for the Pennell family since Arthur Pennell's death, declared that, as far as he was aware, nothing in the papers left by Pennell would throw any light upon the murder of Edwin Budick.

When questioned regarding the alleged defalcations of Pennell, Pennell declined to answer. J. Frederick Pennell, brother of the dead lawyer and administrator of most of the papers, was out of the city, and Pennell informed the court that he did not know where he was, or when he would return to Buffalo.

"Evidence that will show defalcation would simply be cumulative," said Justice Murphy after the evidence was given. "No stronger motive could be proven than has already been brought out here. But proving a motive does not establish guilt. The court is prepared to announce its findings."

Judge Murphy then delivered his verdict as follows: "I find and certify: That Arthur R. Pennell came to his death on the 10th day of March, 1935, as a result of injuries received while riding in an automobile, the said automobile plunging from an embankment into the Gehrs stone quarry."

"That I cannot determine from the evidence submitted, whether such plunge was accidental or designed."

"That Carrie Lamb Pennell came to her death as a result of the said plunge of the automobile into the quarry."

W. C. Omphill, Pennell's stenographer, produced a typewritten copy of the first draft of a statement prepared for publication, by Pennell before his death. The statement in full is as follows:

"Now that the flood of sensationalism and yellow journalism has lessened and that public excitement has died down to a calmer consideration of the facts and events leading up to a terrible tragedy, which has recently taken place in this city, I wish, in behalf of myself, but especially more in behalf of others, whose names are even greater than mine, to make this statement:

"Owing to the fact that my name was so unfortunately at this time connected with the pending divorce proceedings, it was forced into great publicity in connection with the tragedy itself. So far as any possible connection with that crime was concerned, I am satisfied, I think, the District Attorney and his assistants understand thoroughly that I had nothing to do with it, and since that time neither has my house nor myself been under suspicion of surveillance."

"After being out for a short time in the early part of that evening, I spent the rest of it at home, as was shown by the evidence of my wife and my servant girl in our house. I think I was so acquitted, both by the public and the authorities with any connection with the crime."

"It now becomes incumbent upon me to make some statement relative to my connection with the divorce proceedings. In this statement I wish to say as little as possible about the dead. But it must be remembered that those who are living have the right to live, and the rights of the living are greater than the rights of the dead. There was no truth in the charges brought by the plaintiff in that proceeding against the defendant and myself. The charges were absolutely denied under oath, and countercharges had been made, and in a short time the case would have been quietly tried before a referee and settled."

"The relations existing between the plaintiff and the defendant had been strained for some time. Twice he had unjustly attempted to make her leave her home. My wife and myself had taken her side in the controversy that arose between them, and she had consulted me for legal advice and protection. During this time the man himself was in intimate relations with a woman whom he desired to marry. For that purpose, he had been making visits to her home, and he had been through forging a written order over her blank signature, and purloining the keys from her."

"Being thus apprised of the evidence against him, he determined to anticipate her action by bringing an action himself. In order that he might have the appearance of being the injured party, and out of vindictiveness and desire to injure me as much as possible he made me a defendant in the action. His allegations were properly denied, and the issues would have been squarely met, when his death occurred at the hands of some unknown woman whom he had invited to his home at Washington. He will remain in this East until about the time for the President's departure from the park, when he will again join the party at Gardiner or Livingston and complete the remainder of the trip."

BURROUGHS DID NOT GO.
(BY THE ASSOCIATED PRESS-P.M.)
CINNABAR (Mont.) April 10.—Secretary Loeb received no word from the President today. The President is in the mountains at a camp forty miles from his headquarters. When he started for this place yesterday morning, he was his intention to remain there for a number of days, and possibly a week. Snow fell today in the vicinity in which the President has gone, but the fall was not heavy.

John Burroughs, the naturalist, did not accompany the President, as he was suffering from a slight cold. He has almost disappeared now, and it is Burroughs' intention to join the President tomorrow. While Burroughs was with the President off and on during his stay in the park, he will not accompany him on all his trips. The President is studying animal and plant life in the park, and is enjoying himself there.

Dr. Rixey, surgeon-general of the navy, who came down from Mammoth Hot Springs yesterday, left Livingston today for Washington. He will remain in this East until about the time for the President's departure from the park, when he will again join the party at Gardiner or Livingston and complete the remainder of the trip."

intending to reflect in any way either on myself or any other persons involved, are unqualifiedly false and have no basis in fact. They are made up of those unfounded statements of this class of spies which have become of such doubtful value that even if the courts it is now almost held that the presumption is against their credibility."

"Third—During the pendency of the divorce action it became necessary for me to consult with the defendant in reference to the course to pursue. For that reason it was necessary that a meeting should take place here in New York or in Atlantic City, but in such cases, absolutely proven, these meetings are in such places under such circumstances as to absolutely negative any other idea than the purpose of transacting the affairs relative to the divorce action."

"Finally, it may be said that the crime is as great a mystery to the writer as to any one. Terrible notoriety and publicity has been brought upon people, more especially women who have entirely undeserved it, and great wrong has been done all concerned, especially to the family which has suffered and must suffer most, such that we must thank the editor of yellow journalism, which does not hesitate to use every principle of truth, honor, civility, justice and sanctity in the efforts to make news, and which makes that style of journalism one of the sickening things of modern civilization."

LABOR WAR OF THE UNIONS RAGES FIERCELY.

AMALGAMATED MEN TAKING JOBS
LEFT BY BROTHERHOOD.

Gompers and Duncan Arrive in New
York and Try to Pour Oil on the
Troubled Waters, but Fyfe Says
They Won't Succeed.

(BY THE ASSOCIATED PRESS-P.M.)
NEW YORK, April 10.—The struggle between the warring factions of labor was resumed today, the fourth day of the strike. Renewed efforts on the part of the Amalgamated Union to install its members in the places left vacant by the striking members of the Brotherhood were encouraged by the announcement of the second firm of contractors had consented to employ them instead of the Brotherhood men.

The Amalgamated men are coming in from outlying districts, and are being put to work in the big office buildings in course of erection.

Officials of the Brotherhood and Civic Federation express a hope that the second firm of contractors had consented to employ them instead of the Brotherhood men.

President Gompers and Vice-President Duncan of the American Federation of Labor arrived here today. Gompers said: "We are going to see if we cannot settle the difficulties. I have hopes that we may do so at once."

William Fyfe, business agent of the Amalgamated, said he did not think Gompers would be successful.

STRIKERS FALL OUT.
TURBULENCE IN AMSTERDAM.
(BY THE ASSOCIATED PRESS-P.M.)
AMSTERDAM, April 10.—[By Atlantic Cable.] The Workmen's Defense Committee decided today to proclaim a cessation of the general strike at mid-day.

At a monster mass meeting held later in the day the Federated Trades Union repudiated the action of the Workmen's Defense Committee and decided to continue the strike without the consent of the committee. A tumult prevented the members of the defense committee from securing a hearing.

With the exception of the diamond cutters all the men will remain out.

MANIFESTO ISSUED.
(BY THE ASSOCIATED PRESS-P.M.)
AMSTERDAM, April 10.—The Workmen's Defense Committee has issued a manifesto explaining that a continuance of the strike will only expose the strikers to the vigorous penalties of the law. The committee has therefore decided to leave each trade union to act as it thinks best.

The calling off of the strike has resulted in the holding of angry mass meetings of strikers. Some rioting occurred at the Bas works tonight, the police charging a mob of strikers who were intimidating the non-striker workers. A cabinet council was held this evening, and it was resolved to continue the strong military precautions, which had begun to be relaxed.

LOWELL STRIKE.
INVESTIGATION OPENED.
(BY THE ASSOCIATED PRESS-P.M.)
LOWELL, April 10.—The cotton manufacturing corporations of Lowell were on the defensive almost all day during the hearing which is being conducted by the State Board of Conciliation and Arbitration at the behest of the Legislature. At the opening of the proceedings Edward McVey, counsel for the Textile Council, announced that the burden of proof lay with the manufacturers, regarding their claim that they could not pay higher wages.

The Executive Committee of the council thus declining to be put in evidence along a trail by a trooper on horseback, and then a few hours later the dogs are put on the scent.

Dr. Rixey, surgeon-general of the navy, who came down from Mammoth Hot Springs yesterday, left Livingston today for Washington. He will remain in this East until about the time for the President's departure from the park, when he will again join the party at Gardiner or Livingston and complete the remainder of the trip."

history of the present controversy. The agents held, he said, that an advance in wages was an anticipation of future conditions, and that at present it could not be effected.

When an advance was granted in Fall River, Southworth asserted, the price of print cloth was raised so the cost of an advance came out of the pockets of the consumers. The mills with which he dealt, he declared, are old, and the machinery not adapted to finer goods, therefore the impossibility of raising wages.

Southworth denied there was any combination of mill owners to control the prices of goods, or to keep down wages.

ILLEGAL STRIKES.
IMPORTANT DECISION.
(BY THE ASSOCIATED PRESS-P.M.)
NEW YORK, April 10.—One of the most important legal decisions ever announced in the State on the question of the right of a labor union to order a strike has just been handed down by the supreme division of the Supreme Court. It is in effect that a labor union has not the right to order its men to quit work where they are in receipt of the wages demanded by the organization, and where there is no attempt to effect a change in the law, but where the only question over which there is any difference is a refusal of the employer to recognize the union or its representative.

Shaffer Has Walkaway.
PITTSBURGH, April 10.—President T. J. Shaffer of the Amalgamated Association of Iron and Steel Workers will probably be reflected without opposition, as the strike of this city, the most formidable candidate, has withdrawn, saying the general feeling appears that it would be injudicious to interrupt their policy at this time.

Victory for Employers.
CHICAGO, April 10.—Three thousand tanners and curriers returned to work today, ending a strike of several weeks, the settlement marking the first victory of the Chicago Employers' Association since it made a rule to grant absolute union recognition to no labor organization. The Employers' Association and the striking tanners have been at swords points for more than two years over the point of union recognition.

Peace Reigns in Rome.
ROME, April 10.—All the strikers with the exception of the compositors have resumed work, and Rome has regained its normal aspect. Many foreigners have left the city temporarily as returning.

Card Game in Saloon Causes Accusation of Cheating and Deadly Pistol Duel is the Result.
(BY THE ASSOCIATED PRESS-P.M.)
ATHENS (G.) April 10.—In a fight tonight at Jacksonville, twelve miles north of here, four people were fatally shot and one seriously. The fatally wounded are: MRS. HENRY SKROTSKY, CHARLES RILEY, CHARLES COCHRAN, SETH TINKHAM.

The seriously wounded is Henry Hoblett.

The fight occurred in the saloon of which Mrs. Skrotsky is proprietor. Shortly after 7 o'clock, a large crowd assembled in the saloon for an evening of card playing and drinking. At one time Hoblett and Tinkham as partners, were playing Riley and Cochran, who were badly beating their companions. Presently Tinkham and Cochran, who were badly beaten, had been cheated, and remarking angrily, that while he could not play with cards, he could play with a revolver. He pulled out his, his three companions following suit, and the four began to shoot at each other at arms' length. A dozen shots were fired, and when their weapons were empty, they began to throw their revolvers. Mrs. Skrotsky and Hoblett were taken to their homes, while Riley, Cochran and Tinkham were carried on stretchers to the Jacksonville prison, where hundreds of excited people gathered.

Mayor Ginnham of Jacksonville has sworn in many extra policemen to assist in the search for the four men keeping friends of the dying men out of the prison.

F. K. LANE'S STILL HUNT.
Defeated Democratic Aspirant for Governorship of California on the Trail of Vice-Presidential Nomination.
(BY DIRECT WIRE TO THE TIMES.)
AUSTIN (Tex.) April 10.—[Exclusive Dispatch.] Franklin K. Lane, the unsuccessful Democratic candidate for Governor of California at the last election, arrived here this morning and had a conference with Judge James B. Wells, chairman of the Democratic Executive Committee of Texas, and other political leaders who were here by appointment to meet him. It was stated by those present at the conference that Lane was making a tour of the country, particularly the South, for the purpose of meeting the Democratic leaders in furtherance of his campaign for Vice-President on the Democratic ticket. It is said that he was promised the aid of Texas Democrats.

GATES SWING INWARD.
NEW YORK, April 10.—The heaviest work that the Immigration Bureau at Ellis Island has ever had in April and the record ten days for the first part of April ended today with the landing and shipping to other places of 28,076 immigrants since April 1. The record of last year for the first ten days of April was 28,789. Commissioner Williams says there are but few immigrants and a very small percentage ordered deported. The class arriving is above the average regarding education and cultivation.

WRECK AT LORDSBURG.
TUSCON (Ariz.) April 10.—A star special train from Lordsburg, N. M., says that the west-bound passenger train, No. 1, which Superintendent J. C. Sroufe's private car attached, collided with an east-bound freight on an open switch early this morning. Engineer Clark, the train, was killed. The freight was both seriously injured. No fatalities.

Marvellous Steel Process.
Norfolk, Va., Man Claims that by a Chemical Process He Can Raise Temperature to Fifty-cent Grade.
(BY DIRECT WIRE TO THE TIMES.)
NEW YORK, April 10.—[Exclusive Dispatch.] What several experts who have examined it say may revolutionize the process of converting steel from the cheapest to the highest grade is the invention which George E. Pinkham of Norfolk, Va., who is now in this city, has made after experiments of twenty-seven years. The new process which Pinkham has invented is based on chemicals.

Pinkham said today: "This process will make better steel, at a cost of about 2 cents per pound, than any steel I have ever seen, even that metal which is made by the Bessemer process. By its use, old steel tools, even those that have been burned and are supposedly worthless, can be made as good as the finest grade. Just by hand work, I can transform 200 pounds of steel a day from 10-cent to 60-cent steel."

THE PHILIPPINES. FORT TAKEN BY ASSAULT.

Pershing Gives Bacodians a
Salutary Session.

Hundred Moros Slain in Battle
and Many Wounded.

Date of Panandungan Among
Dead—Parahue is Next
on the List.

(BY THE ASSOCIATED PRESS-P.M.)
MANILA, April 10.—[By Manila Cable.] Capt. Pershing's force captured Bacod, Island of Mindanao, Wednesday, killing 100 Moros and wounding many others. Three Americans were wounded. Pershing's force consisted of Shaw's Battalion of the Twenty-seventh Infantry, Klipatrick's troop of the Fifteenth Cavalry, and McNair's Battery.

Pershing was surveying the west shore lands when the Bacodians opposed his advance, and provoked the fight.

Pershing's force surrounded and attacked the stronghold, first shelling it, and rushing his troops forward, charged gallantly. After crossing a deep moat and entering the fort, the Americans engaged the Moros, bayonets against rifles. A hundred of the defenders were killed, including the date of Panandungan, and many were wounded. Only three Americans were wounded. After the capture of the fort it was destroyed.

The Bacod leaders and the majority of the people of that district had been hostile to the Americans, and encouraged attacks on American camps. They rejected the terrors of friendship.

It is expected that the defeat of the Bacodians will result in all the Moros acknowledging American sovereignty. Pershing's column is going to Parahue, which is also hostile.

FOUR FATALLY SHOT.

Pinkham said today: "This process will make better steel, at a cost of about 2 cents per pound, than any steel I have ever seen, even that metal which is made by the Bessemer process. By its use, old steel tools, even those that have been burned and are supposedly worthless, can be made as good as the finest grade. Just by hand work, I can transform 200 pounds of steel a day from 10-cent to 60-cent steel."

WRECK AT LORDSBURG.
TUSCON (Ariz.) April 10.—A star special train from Lordsburg, N. M., says that the west-bound passenger train, No. 1, which Superintendent J. C. Sroufe's private car attached, collided with an east-bound freight on an open switch early this morning. Engineer Clark, the train, was killed. The freight was both seriously injured. No fatalities.

Marvellous Steel Process.
Norfolk, Va., Man Claims that by a Chemical Process He Can Raise Temperature to Fifty-cent Grade.
(BY DIRECT WIRE TO THE TIMES.)
NEW YORK, April 10.—[Exclusive Dispatch.] What several experts who have examined it say may revolutionize the process of converting steel from the cheapest to the highest grade is the invention which George E. Pinkham of Norfolk, Va., who is now in this city, has made after experiments of twenty-seven years. The new process which Pinkham has invented is based on chemicals.

somersault into the river from a height
of twenty feet.

HIGHER PURSES AND STAKES.

CALIFORNIA JOCKEY CLUB BID.

(BY THE ASSOCIATED PRESS—A.M.)

SAN FRANCISCO, April 10.—While
no official announcement has been
made, it is an open secret, says the
Chronicle, that the new California
Jockey Club will make a bid for promi-
nent stakes next season by offering in-
creased purses and stakes. The matter
has been thoroughly discussed by the
directors of the association, and there
is a strong feeling that in order to get
first-class horses from various racing
centers, it will be necessary to offer sev-
eral substantial overnight purses and
handicaps.It is not unlikely that there will be
several \$500 purses every day, and a
\$500, \$750 and \$1000 handicap every week.
New and valuable stakes are also to be
added to the present list.

CRESCUS OUT OF IT.

WILL NEVER RACE AGAIN.

(BY THE ASSOCIATED PRESS—A.M.)

NEW YORK, April 10.—George
Ketcham, owner of the world's cham-
pion trotter Crescus, 2:02 1/4, announces
that the horse will never race again.
If Ketcham does conclude to send the
champion another trial, he says, it will
be for the purpose of breaking the
world's record to high-wheel sulky.
2:06 1/4, held by Sunol.There is one other exhibition Cres-
cus may give, and then he will be re-
tired permanently to the stud," said
Ketcham. "I am going to Europe in the
fall, and will take the horse with me.
I may arrange for a big exhibition in
London for the benefit of some chari-
ty. That will be the last time the
champion will ever be exhibited."

EMPIRE CITY RACES.

E. I. HOWARD ENTERS CONFER.

(BY DIRECT WIRE TO THE TIMES)

BOSTON (Mass.) April 10.—[Exclu-
sive Dispatch.] Among the entries in
the early closing stakes of the Em-
pire City track grand circuit meeting,
announced today, is the bay horse
Bonnie Russell by Conifer, entered by
E. I. Howard of Los Angeles, in the
Empire \$5000 stakes, 2:20 trot. Budd
Doble of San Francisco has entered his
Kinney Lou in this stake, and J. Gal-
lego of Mission San Jose has named
two in the Yonkers \$3000 stake, the
2:20 pace. The latter are bay geld-
ing Diabolo and the black filly Trilby.

WITSTOOD THE CHAMPION.

WRESTLER JOHNSON'S VIGOR.

(BY THE ASSOCIATED PRESS—A.M.)

HARTFORD (Conn.) April 10.—George
Bothner, the lightweight champion
wrestler of the world, failed last
night to throw Oscar Johnson of this
city twice within an hour, which were
the conditions of the match. Bothner
succeeded in putting the shoulders of
the New Englander to the mat once in
the allotted time, but for the re-
mainder of the bout Johnson seemed to
be on even terms with him.

TOMMY FELTZ WILLING.

TO MEET "YOUNG CORRETT."

(BY THE ASSOCIATED PRESS—P.M.)

SAVANNAH (Ga.) April 10.—A cer-
tified check for \$1000 was deposited to-
day on behalf of Tommy Felts to bind
him for a match with "Young Cor-
bett" for the featherweight cham-
pionship, the men to weigh in at the limit,
122 pounds at the ringside, or for a
match with Harry Forbes for the
bantamweight championship, the men
to weigh in at 115 pounds.Felts is willing to meet either of the
men before a responsible club, and his
forfeit is up. He claims the cham-
pionship in both these classes, asserting
that neither Corbett nor Forbes has
fought at that weight in months.

MONTGOMERY PARK RACES.

MEMPHIS (Tenn.) April 10.—Mile,
selling: Glendon won, Emir second,

Pennsylvania Legislature Passes Libel
Bill—Newspaper Publishers Granted a
Hearing by the Governor.

(BY THE ASSOCIATED PRESS—P.M.)

HARRISBURG (Pa.) April 10.—The
libel bill which has stirred up the en-
tire press of the State, came
into the possession of Gov. Pen-
nypacker late this afternoon for his ap-
proval or disapproval. The bill passed
the House finally today by a vote of
125 to 57, after a somewhat bitter fight.
Three Democrats voted with the ma-
jority, and twenty-three Republicans
joined with the minority. United States
Senator Penrose and other Republican
leaders have been on the ground sev-
eral days directing the bill. The Penn-
sylvania newspapers are taking a lead-
ing part in opposing the bill. Today the
publishers asked the Governor for a
hearing on the ground that their rights
and property are involved. The Gov-
ernor granted the request and will fix
a day for the hearing. He has thirty
days in which to approve or disapprove
the bill.

The members of Bartlett-Logan Post, G.A.R.,
are notified to attend the funeral of our late
comrade, John C. Smith, from his late resi-
dence, No. 131 West 24th street, at 2 p.m.,
Sunday, April 12, Interment Evergreen Cem-
etery, Veterans Drum Corps and all veterans
invited. SAM KITZ, Commander; JOHN
DAVIS, Adjutant.

Cure every kind of kidney ill—backache, lame back, urinary
troubles, diabetes—

Want Proof? Read What a Los Angeles Woman Says:
Mrs. Mary Brown of 205 Rose St. says: "It is so long ago since
I had my first attack of backache and kidney complaint that I have
actually forgotten when it took place. During the last five years
the aching, if not constant, was always in evidence. I overtaxed
myself, contracted a cold or did anything which brought a strain
on the muscles of the back. I was continually using medicine or
rubbing on liniments and wearing plaster, but I never received
any lasting benefit. I never used a preparation which brought as
undoubted results as Doan's Kidney Pills, procured at Dean's Drug
Store. No one in Los Angeles at all troubled with backache or any
of the consequences which follow in the wake of kidney complaint
need have the slightest hesitation in using Doan's Kidney Pills.

Doan's Kidney Pills are for Sale at all Drug Stores—50c Box.

THE TIMES-MIRROR COMPANY.

H. G. OTIS, President and General Manager.
HARRY CHANDLER, Vice-President and Assistant General Manager.
MARIAN OTIS-CHANDLER, Secretary. ALBERT McFARLAND, Treasurer.
PUBLISHED BY THE TIMES-MIRROR COMPANY

The Los Angeles Times

Daily, Weekly, Sunday, and Weekly Magazine.

Vol. 43, No. 130.
EVERY MORNING IN THE YEARFounded Dec. 4, 1881.
Twenty-second Year.

NEWS SERVICE: Full reports of the new Associated Press, covering the globe; from 12,000 to 15,000 words transmitted daily over more than 2,500 miles of leased wires.
TERMS: Daily and Sunday, including Magazine Section, 75 cents a month, or \$6.00 a year; Daily without Sunday, \$7.50 a month; Sunday, \$2.50; Magazine only, \$2.50; Weekly, \$1.50.
CIRCULATION: Daily net average for 1934, 19,001; for 1933, 19,258; for 1932, 18,181; for 1931, 22,781; for 1930, 22,738; for 1929, 22,778; for year ended September 30, 1932, 20,506; NET SUNDAY AVERAGE, 45,506.
TELEPHONES: Counting Room, Subscription Department, Editorial Rooms, City Editor and local news room, PMA 2.
AGENTS: Eastern Agents, Williams & Lawrence, Nos. 21-23 Tribune Building, New York; 11 Washington street, Chicago; Washington Bureau, 41 Post Building, where the latest edition of the Times may be consulted.

Office: Times Building, First and Broadway.

Entered at the Los Angeles Postoffice for transmission as mail matter of the second class.

BUSINESS.

Local clearings yesterday amounted to \$91,948.47, as compared with \$83,439.05 for the corresponding period a year ago. Business is brisk throughout Southern California.

Yesterday was a holiday, Good Friday, on Eastern Exchanges.

STAND FAST!

A general strike of union men engaged in the building trades in Los Angeles was ordered yesterday. All union workmen employed upon buildings where non-union labor is also employed were ordered to quit work. Many obeyed the order, and are out of employment in consequence.

The local conflict which has long been threatened seems at last to have materialized. It is the avowed intention of the union-labor bosses to tie up the building trades in this city completely, if possible. It remains to be seen how far this conspiracy against the prosperity and welfare of Los Angeles, and against the welfare of the whole body of working people, will be successful.

The strike was not ordered because of dissatisfaction with wages or hours of labor. The unreasonable demand is made that all employers shall institute a black-list against all employees who do not belong to a union. This is in effect a demand that all work that is to be performed in the building trades shall be given to members of the unions, and that men who are not members of the unions shall be denied the right to work and to live.

Such demands can never be complied with by any self-respecting employer, nor countenance in any self-respecting community.

The right of every man, unionist or non-unionist, to quit work is undeniably and undeniable. Likewise, the right of every man to work if he so desires, and for whom he pleases (provided his services are sought), is not to be denied. These rights cannot be overlooked or abridged, if liberty is to live in the land and law is to survive. Interference with these simple, fundamental and inalienable manhood rights is what causes most of the trouble in all strikes.

It is a time for employers to stand fast. It is also a time for independent workmen to stand fast. Both classes have had object-lessons without number as to the inestimable value of united resistance to trades-union tyranny. The way for them to win, in the impending contest, is to present a united front to the opposition. Employers are compelled, by the unreasonable demands made upon them, to meet organization with organization. It is imperative in the present crisis. To grant the preposterous demand of the allied unionists would be to place their necks irrevocably under the galling yoke of union despotism.

Los Angeles has been, thus far in its industrial history, a free community. It will remain so if every man upon whom is imposed the responsibility of action will stand fast in defense of his rights as an American citizen.

It is a time for non-union men to come to the front. They have an inalienable right to work on any job where the conditions are satisfactory to them and to their employers. They have a legal and moral right to refrain from joining labor unions if they see fit. No man or set of men can have any right, legal or moral, to interfere with them in the pursuit of a legitimate occupation. Knowing their rights, they should stand fast in the exercise and the defense of them to the end.

It is also a time for union workmen who are opposed to strikes and to the aggressions of the malcontents in their own ranks, to stand fast. They have the right to resist the domination and the despotism of the walking delegates, which are exercised almost as much against well-disposed unionists as against non-union men.

It is expedient for employers to hold themselves in readiness at proper times to confer freely with their own men, in order to ascertain their feelings and their wants, but they will do well to steadfastly re-

fuse to confer with "walking delegates," "business agents," or other mischief-making outsiders possessing no right to intervene between employer and employee.

The impossibility of complying with the demand that all non-union men shall be discharged, as a condition precedent to the return of unionists to work, must be clearly apparent to every employer who looks the situation squarely in the face. It is, indeed, a question that is not debatable. The outrageous injustice of it places it beyond the pale of rational discussion.

It is a time, also, for the authorities who are charged with the maintenance of public order to stand fast. There may be no lawlessness during the pending struggle. But lawlessness is an almost invariable accompaniment of strikes, and the probability of its occurrence must be taken into account in all affairs of this kind. The people of Los Angeles will expect their peace officers to do their full duty in maintaining the peace during the strike.

It is a time, finally, for all good citizens to stand fast for truth and right and justice, the maintenance of law, and the protection of the rights of every person. Let good men encourage other good men who may be beleaguered industrially, giving them aid and comfort in every proper and practical way.

Let these things be done, and no strike can permanently succeed in Los Angeles.

Then stand fast and organize!

THE "MERGER" DECISION.

Again the demagogic claim that the courts are biased in favor of capital and capitalist combinations has been refuted. The decision of the United States Court of Appeals, at St. Paul, Minn., sustaining the contention of the government in the so-called merger case furnishes this refutation, as did the decision in the case of the packers' combine, rendered a few weeks ago. These decisions also dispose of the oft-repeated assertion that the Sherman anti-trust law is inoperative and impractical, and that it was enacted with the understanding that it would prove impotent for the restraint of trusts. Both of the decisions referred to are based upon the Sherman law, which prohibits the restraint of interstate commerce, and they show that that law, so far from being inoperative, is in full force and operation, and is capable of accomplishing, in part at least, the purposes for which it was enacted.

In the merger case the court finds that the words "in restraint of trade or commerce" "do not mean in unreasonable or partial restraint of trade or commerce, but in any direct restraint thereof; that an agreement between competing railroads which requires them to act in concert in fixing the rate for the carriage of passengers or freight over their respective lines from one State to another, and which, by that means, restricts temporarily to name such rates for the carriage of such freight or passengers over its road as it pleases, is a contract in direct restraint of commerce within the meaning of the act, in that it tends to prevent competition." The court further holds that "it matters not whether, while acting under such a contract, the rate fixed is reasonable or unreasonable, the vice of such a contract of combination being that it confers the power to establish unreasonable rates, and directly restrains commerce by placing obstacles in the way of free and unrestricted competition between carriers who are natural rivals for patronage." In the opinion of the court, "Congress has the power, under the grant of authority contained in the Federal Constitution, to regulate commerce; to say that no contract or combination shall be legal which shall restrain interstate trade or commerce by shutting off the operation of the general law of competition."

Those persons who have held to the pessimistic view that no way can be found to check or do away with the evils of trusts and other combinations may yet find occasion to revise their opinions; and to take a more cheerful view of the situation. The tendency of the courts is distinctly in the direction of a strict interpretation of the laws designed to restrain or remedy the evils of combination. If it be found, upon ascertaining the full scope and power of

these laws, through their rigid enforcement, that they are inadequate to the accomplishment of the ends sought, Congress and the various State Legislatures will in due time, no doubt, enact other laws to meet cases and conditions as they may arise. Meanwhile, as a broad general proposition, the courts may be depended upon to interpret and enforce the laws in such manner as to protect and conserve the interests of all classes of the people. There are exceptions to the rule, as a matter of course, for judges are but human, and not all laws which they are called upon to enforce are good laws. But if the laws are evil, the remedy rests with the people themselves, who are the source of all authority upon which laws are made and judges chosen. The fact should never be forgotten nor underestimated that the people are supreme, and that the government, good or bad, is but the creature and the instrument of their will.

MR. THOMAS "HAS WENT."
A dispatch from San Francisco, published in The Times of Friday, announced that William Thomas had resigned his position as vice-president and chairman of the Executive Committee of the California Water and Forest Association. He sent his resignation in a communication which shows very clearly that he is feeling quite sore. It abounds in wry attempts at humor and flings at the public and the press, from whom he says he has received "the most insulting letters and read the most insulting circulars and editorials."

This letter proves—if any further proof were necessary—that Mr. Thomas is a person of too small caliber to successfully fill the position which he held. He and his associates were criticized by the people and the press—and justly criticized—because the association attempted to foist upon the State legislation which would have made confusion worse confounded, and would surely have materially retarded the growth of California, by striking a blow at one of its most important features, namely, the irrigation system. If Mr. Thomas had taken the people into his confidence, and sought the advice of water users rather than of water sellers, and had manifested a sincere desire to further the interests of the State rather than those of a small clique of selfish and grasping men, he would not have had cause to complain of "attacks" on the part of the people and the press. Instead of that, he went into training with the Ellwood Mead crowd of State economists and cattle barons. Not only that, but he deliberately misrepresented facts, and showed bad faith, by promising the irrigationists that an objectionable clause in his proposed bill should be eliminated, which was not done.

In his letter of retirement Mr. Thomas "points with pride" to the passage of Assembly Bill No. 75. This bill appropriates \$60,000 for topographical surveys and forestry work, to which the Federal government will add a like amount. As a fact, this bill was passed in spite of the support of the Water and Forest Association. The fact that it had such support made many people suspicious of it.

As The Times has said, between now and the meeting of the next Legislature the irrigationists of California will get together, and after careful consideration outline some practicable plan for water legislation. It will, doubtless, as hitherto predicted in these columns, take the shape of a law permitting the irrigationists in each hydrographic basin to frame for themselves laws not in conflict with the Federal laws, just as is done by miners in the various mining districts, each of which has a recorder. In this great State, with its many varying conditions of water supply and distribution, it is manifestly impossible to frame a law that will be satisfactory, and just to all sections.

Meantime, now that the executive chairman of the California Water and Forest Association has, with more or less grace, retired to the rear, and sat down, The Times would again suggest that it would be a good thing for California if the association itself should emulate his example, and give up the ghost. It has been nothing but a disturbing element and a public nuisance ever since it started.

The lady who writes a letter to The Times calling for defense against the masher and loafer who follow and insult women on the street, has evidently not read her copy of this great religious daily with due care, nor has she discovered that action has been commenced by the powers that be looking to the suppression of the cattle of that ilk. At the same time she deserves the thanks of her sisters for calling renewed attention to this national disgrace, and the club case needs only to hold a position where he can "sight."

The fact that a newspaper man's dog was killed in Yellowstone Park is no evidence that the slaughter of game has commenced. Probably he wasn't a game dog.

A Washington dispatch states that the price of eastern crude oil jumped up the other day from \$1 to \$1.50. Wonder what in the mischief John D. is up to now?

Snow is thirty feet deep at some points in Colorado. And still they talk about attracting tourists over in that country. Huh!

Uncle Sam is still struggling to build a postoffice in Los Angeles, and good-natured knows we need it.

There is likely to be about as many different opinions regarding the new

one who is struck hails from. And there are, about in the same old place that we were before Mr. Watterson arose to his feet and offered his few remarks.

There is to be a round-trip rate of \$45 between the Missouri River and Los Angeles during the Presbyterian convention in this city. It looks as though we were going to have another busy summer out in this neck of the woods. When people can get to Los Angeles and back for less than \$50 they are bound to come. And when they get here a good many of them won't want to go back, at any price, and that isn't the worst of it for us.

J. Ogden Armour is said to be planning a wheat corner. Possibly Mr. Armour has forgotten that there was once a man in Chicago by the name of Jim Leiter. If he hasn't it might be the part of wisdom for him to hunt up the gentleman and get a few pointers on what a corner can do to a fellow when it breaks over the banks and gets on the rampage.

Mr. Roosevelt prefers the word "spit" to the word "expectorate." Really, there doesn't seem to be much sense in wasting that use of seven letters, especially when everybody knows that the words mean the same thing. Simple words are always the better. A leg is no less a leg, if it be called a "limb."

Scientists may proclaim to the world until their lungs are sore that kissing is likely to communicate the grip, but they can't stop it. The kisser, and the place to put it, we have always with us, and the combination is forever at work. Out upon science when the lamps of love are lighted!

The fountain pen is an instrument that gives down ink when you don't want it, and that doesn't give down when it ought to. Next to the telephone, the fountain pen has probably done more to break down Christianity in this country than any other one thing.

The defeat of the merger scheme in court will doubtless serve to postpone a little longer the operation of the railroad by the government, but should the scheme be found lawful by the Supreme Court it is likely to hasten things in that direction mighty fast.

If the new league Los Angeles team can play the game of baseball like the bunch of swatters on the south side of the street, and both teams keep it up, this old city is going to be the proudest municipality, at the end of the season, that ever happened.

It is probably just as well to settle the question now as any other time, whether the builders of Los Angeles are going to run their own business, or whether the men they pay wages shall run the machine. Somebody must be boss of the works.

Emperor Francis Joseph of Austria has recently engaged in a foot-washing exercise, but those reputations that we have been hearing considerable about of late appear to be in their normal condition—more or less mussy in appearance.

Mr. Keene has gone abroad because he needs a rest. It certainly must be tiring to play some kind of an animal game the time we forget what animal James was playing last, but seems as though it was a bull.

The beef trust and some other mergers are not feeling quite so gay as they were before the court decision in its decision in the recent case at bar. It seems to be quite lucky for the steel trust crowd that they worked their big deal early in the game.

If Los Angeles could have had about two hundred miles of shade trees planted out before this great spell of growing weather set in, this town would have had something to be proud of in its immediate midst.

There would be one strong point about the nomination of Carter Harrison for the Presidency. Many Republicans would doubtless vote for him because of habit in voting a ticket with Harrison on it.

With Carter Harrison and Willie Hearst as possible candidates for the Presidency, it is plainly to be seen that the old party is living up to its reputation as "the great unwashed."

Missouri now has a law which prohibits the selling or giving away of cigarettes to minors under eighteen years of age. The limit is entirely too low. Ante and pass the buck.

The building goose that has been laying the golden eggs for the mechanics and artisans of Los Angeles appears to be getting hit with a rock, even if she isn't dead yet.

Missouri has a clergyman who declares that he proposes to tell the truth at funerals. It is plain to be seen that there is a man who will not be working much, from now on.

The people back East are trying to make up their minds whether spring has come, or whether the snow is necessary to hold an election to settle the matter. Different here.

The cable people promise to have the line completed to Manila in time for the celebration of the glorious Fourth. That will be the eagle's sure-enough day to scream.

It must be a great relief to the President to get beyond the reach of the telegraph and far from the maddening rattle of typewriters, for even a few blissful days.

The promise is made that the czar will abolish punishment by flogging. The men who say that the world isn't moving should take up a position where he can "sight."

The fact that a newspaper man's dog was killed in Yellowstone Park is no evidence that the slaughter of game has commenced. Probably he wasn't a game dog.

A Washington dispatch states that the price of eastern crude oil jumped up the other day from \$1 to \$1.50. Wonder what in the mischief John D. is up to now?

Snow is thirty feet deep at some points in Colorado. And still they talk about attracting tourists over in that country. Huh!

Uncle Sam is still struggling to build a postoffice in Los Angeles, and good-natured knows we need it.

There is likely to be about as many different opinions regarding the new

convention hall as the blamed place will hold, no matter how big it is.

The Shamrock III shows up in the preliminaries in great shape, and we are glad of it. It isn't any fun to beat a yacht that has a tugboat gait on it.

Kansas has had her first tornado of the season, but Alabama set the pace. However, we are betting our money on Kansas in the finals.

If you see a handbox coming out to your house today you may know that there will be something doing at church tomorrow.

The Mayor-elect of Pasadena is now regretting that he doesn't live in a brushy country—the job-chasers are after him.

Hyde Park, near Chicago, or a part thereof, is having a small-scale scare. Fearful of having her Hyde pitted, probably.

The Yellowstone Park wild cat has been charged with an outrage. Now, let's see if the President can lick his weight in 'em.

Jim Hill says he is as empty as a barrel. But his picture that appears in the newspapers from time to time don't look it.

The trouble with the Canadian Annexation League is that it is trying to do business on the wrong side of the line.

St. Louis claims to have been purified by the recent election. All right, now go ahead with your exposition.

From those who have nothing, much shall be taken. Adlai Stevenson has had his hair singed off.

The Irish are rotten-egging men and women now for playing Irish plays. This is yellow work.

The bloom is on the foothills, and by this time tomorrow the color will be on the egg.

The lady who can keep this spring's style of hat on straight will be a wonder of her sex.

If we are going to build a convention hall, let us not be small about it.

SONG OF THREE CENTS IN THE ANGELS' TOWN.

UNIVERSITY GLEE CLUB'S HIT ON GARLAND'S FRANCHISE.

Successful Season Closed Last Night With Concert that Pleased Audience of Fifteen Hundred—Fine Chorus and Solo Work.

When the sixteen members of the Glee Club of the University of Southern California marched out on the platform at Simpson (University) Auditorium last night, singing "On Golden Land," by E. E. Beamer, they captivated the audience of 1500 persons, assembled to listen to their programme.

A stalwart body of typical collegians they were, and their singing detracted not a lighted candle to the high standard the flames shot upward among the hangings to the ceiling. At the first of the night, the choir sang abruptly in its singing, and there was an uneasy shuffling among the large congregation. One of the clergymen told the audience there was no danger and advised them to remain quietly in their seats. While several of the worshippers were leaning down in the blazing draperies and stamping out the flames, the choir resumed its singing, and continued until the flames were entirely subdued. One man was severely burned about the face and hands. The property loss is small.

PLOTTED AGAINST KING.
VIENNA, April 10.—The rumors of a plot against the life of King Alexander of Serbia received apparent confirmation in private dispatches, which have been received here. Sunday and Monday, according to these, an attack on the King's life was planned for next Sunday. The plot was discovered, and fifty persons suspected of the same, therein were arrested. Other arrests are expected.

MARCH CIRCULATION OF THE TIMES.
The following sworn statement of circulation of The Times for March, 1935, shows the daily average to be the largest in the history of the paper.

STATE OF CALIFORNIA, COUNTY OF LOS ANGELES, ss:
Harry Chandler, Assistant General Manager of the Los Angeles Times, does solemnly swear that the actual number of copies of that paper printed and sold for each day of March, 1935, as shown by the office records, was as follows:

1.	32,000	17.	33,500
2.	32,700	18.	33,500
3.	32,700	19.	33,500
4.	32,700	20.	33,500
5.	32,700	21.	33,500
6.	32,700	22.	33,500
7.	32,700	23.	33,500
8.	32,700	24.	33,500
9.	32,700	25.	33,500
10.	32,700	26.	33,500
11.	32,700	27.	33,500
12.	32,700	28.	33,500
13.	32,700	29.	33,500
14.	32,700	30.	33,500
15.	32,700	31.	33,500
16.	32,700		
Total	1,198,000		

Subscribed and sworn to before me this 1st day of April, 1935.
T. L. CHAPIN,
Notary Public in and for the County of Los Angeles, State of California.

The average circulation for every day of March, 1935, was 38,711.
The average circulation for every day of March, 1934, was 38,812.

Showing an average daily gain for March, 1935, of 9,000.
NOTE:—The Times has been published in Los Angeles which regularly makes sworn detailed circulation statements.

ANOTHER ADVERTISING RECORD-BREAKER.
The volume of advertising in The Times for the month of March, just past, eclipses all previous records. A grand total of 3,000,000 words of paid advertising was printed during the month of March, 1935, as against 2,500,000 words for the same month in 1934. The average number of columns printed each day in March, 1935, was 1,000, as against 850 for the same month in 1934. The Times is not a half-dozen newspapers in the country which print all told, leading matter and advertisements, a total of sixteen pages.

The volume of columns of advertising printed in the three other Los Angeles papers (one morning, one afternoon, and one evening) was 2,500,000 words, as against 3,000,000 for The Times alone, showing the latter to have printed 250,000 words more than the other three combined.

The following are the March figures for all Los Angeles and San Francisco newspapers:

Los Angeles Times	3,000,000
Three Los Angeles papers (one morning, one afternoon, and one evening)	2,500,000
San Francisco Chronicle	1,750,000
San Francisco Examiner	1,750,000

THE CITY IN BRIEF

NEWS AND BUSINESS.

Veterans and President.

The veterans of the Army and Navy Republican League purpose to actively assist in the reception of the President on his visit here May 11. The league tonight in their hall, No. 1234 South Spring street, Refreshments will be served.

Dislocated Hip.

F. E. Elser was severely injured while at work yesterday afternoon on South Broadway, between Sixth and Seventh streets. He was near the top of a ladder, when his foot slipped and he fell to the floor. His right hip was dislocated, and he sustained a number of severe bruises. The dislocation was reduced by Police Surgeon Smith.

Against Low Gas.

Resolutions opposing establishment of the Low or other gas plants in the Eighth Ward were passed at the close of a meeting of citizens of the ward in U.B.R.E. Hall last night. Dennis Callahan, Nick Queirolo, R. F. Sepulveda, M. C. Fordham and E. L. Hutchison spoke against the Low gas plant. Clyde Taylor and a dozen others strongly supported the new company.

Maxwell is Coming.

George H. Maxwell, chairman of the Executive Committee of the National Irrigation Association, who has been expected for several days, telegraphed from Phoenix to a friend that he has been delayed, and will be in Los Angeles on Monday, to stay about a week. Mr. Maxwell has been meeting with good success in organizing the land owners of the Salt River Valley, for the purpose of bringing about conditions that would enable the government to undertake the construction of the Tonto Basin reservoir.

Will Look at Hospital.

Octavius Morgan, president of the State Board of Architecture, goes Saturday night to San Francisco to attend the annual meeting of the board, which convenes Tuesday, April 14, the other members of the board from Southern California are: Summer Hunt, F. L. Roehrig, J. P. Krempfle of this city, and Arthur Hebbard of San Diego. Mr. Morgan, while up north, will look into hospital construction in the interests of the county, he having been appointed consulting architect by the Board of Supervisors of Los Angeles county.

Injured on the Iowa.

Fred Purrucher of Los Angeles, whose parents live at No. 465 Avenue 22, was one of the injured in the explosion of a big gun on the battleship in Friday, while at target practice off the Florida coast. Word came yesterday that young Purrucher had one arm torn off and suffered a very serious injury to one eye. Purrucher enlisted in this city four and a half years ago, and made an excellent record, being advanced from apprentice to gunner's mate. His enlistment would have expired next Christmas, but he had contracted re-enlisting and devoting his life to the navy.

Charged With Robbery.

Juan Sanchez, Augustin Herrera and Lorenzo Baraja were arrested Monday by Deputy Constable Humphries for fighting on the street, and a small boy told the officer that Baraja's money had been taken by his assailants, but Baraja asserted that the Constable had taken his money from him when he made the arrest. All three of the prisoners were fined, and after they were placed in jail, the money which Baraja had lost was found on the persons of Sanchez and Herrera. They were accordingly charged with robbery, and will be arraigned on that charge today.

Infringement Suit.

With reference to the suit brought by the Aeolian Company of Meriden, Ct., against Murray M. Harris, the Los Angeles organ builder, for alleged infringement of a patent granted in 1908, Mr. Harris states that the action relates to the automatic self-playing attachment used in his organs, for which patents were issued to his superintendent, W. B. Fleming, in 1899 and 1900, three years later than the patent of the Aeolian Company, for whom Mr. Fleming formerly worked. There can be no infringement, Mr. Harris says, as he and his company are acting strictly within their own patent rights.

Parade and Knee Drill.

The local Salvation Army will inaugurate Easter Sunday and the annual week of self-denial and prayer next Sunday morning by an early-morning street parade and knee drill. Leaving No. 101 San Pedro street at 7 o'clock Sunday morning, the Salvationists will march to the headquarters hall, No. 438 South Spring street, headed by a brass band, where a union meeting will be conducted by Maj. and Mrs. Connell. Special services will be held at each of the halls afternoon and evening. Funds raised during the week of self-denial and prayer will be devoted to the home and foreign mission, Sixth and Alvarado.

Hanford L. Gordon, the owner of the Gordon Block on Broadway, and of various other valuable properties in this city, has just sold to local parties, through the Kennedy Realty Company, a lot, 10x115 feet, unimproved, on the northeast corner of Alvarado and Sixth streets; consideration named, \$1000. Mr. Gordon bought the property about three years ago from J. F. Jenkins for \$4000. Rumor connects the names of Cowen & McManis with the purchase of the lot, and it is said that they intend to improve the property with a modern family hotel, that will cost between \$60,000 and \$70,000.

Is Welch the Man?

John Welch, a teamster, was arrested yesterday on a charge of battery, and if he is convicted, he may be severely punished, for he is alleged to have committed a brutal and unprovoked assault upon a Chinaman simply because the latter did not belong to a union. The assault was committed in the bar at the National Hotel, near the Plaza, the victim being a Celestial named Peck. He was fixing an electric light when he was assaulted by one of a party of teamsters who objected to his doing work which they thought should be reserved for some union workman. The Chinaman was severely injured, and his assailant escaped. The police arrested Welch on information given them by persons who had witnessed the assault. He will be tried today.

Took Too Much Dope.

B. W. Faust, aged about 40 years, about whom little is known by the police, died at the Receiving Hospital yesterday afternoon from the effects of an overdose of morphine. He was roomed at a lodging-house at No. 607 1/2 North Main street, and is supposed to have been a laborer. Yesterday morning he was found unconscious in his room, and was sent to the Emergency Hospital on Ruth avenue, between Fifth and Sixth streets. The physicians there succeeded in reviving him sufficiently for him to tell them that he was addicted to the use of morphine, and had taken too large a dose. Later he was removed to the Receiving Hospital, and shortly after 5 o'clock yesterday afternoon his heart failed, and he died. The body was removed to Pierce Bros.' undertaking establishment, where an inquest will be held, probably on Monday.

Investigation made by the deputy coroner satisfied that official that the case was not one of suicide.

Death Due to Accident.

The coroner held an inquest at Redondo yesterday on the body of John J. O'Brien, aged 30 years, who died there of injuries received the day before at Manhattan Beach. O'Brien had secured employment in the service of the Los Angeles and Redondo Railway on Tuesday, and on Wednesday, at Manhattan Beach, he slipped from the car in a cut. In attempting to climb the side of the cut he slipped and fell. His head struck the side of the car and his skull was fractured. Death followed in less than twelve hours. The verdict of the coroner's jury was that death had resulted from accident. But little is known about the deceased. He had told his fellow-workmen that he was formerly in the United States Navy, but said nothing about his family relations. The body will be held in the hope that his relatives may be communicated with.

BREVITIES.

The choir of the First Presbyterian Church, which is composed of Mrs. J. T. Newkirk, soprano, and director; Sibyl Conklin, contralto; Sheldon Balingier, tenor; Forrest Carr, bass, and Amelia Brown, organist, will render special music Easter morning at 10 o'clock of the church. Located at the corner of 20th street and Figueroa.

Rev. Dr. George Thomas Dowling will deliver an Easter sermon Sunday morning at 11 o'clock in Christ Protestant Episcopal Church, Flower street, corner Pico (13th street). "Through the Gates Into the City." Both University and Pico Heights cars pass the door.

"The Wireless" (daily newspaper) published at Avalon, Santa Catalina Island, is on sale at The Times Business Office. This unique paper receives the entire budget of world's news each morning by wireless telegraph between San Pedro and Catalina Island.

There is an undelivered telegram at the Postal Telegraph-Cable office for J. F. Tapley.

MARRIAGE LICENSES.

The following marriage licenses were issued yesterday from the office of the County Clerk:

Paul Seabold, aged 78, and Mrs. Catherine Flues, aged 67, natives of Germany and residents of Los Angeles.

Alfred Johnson, aged 34, and Hedwig Ahlberg, aged 32; natives of Sweden and residents of Los Angeles.

George G. Parker, aged 41, a native of California, and Sylvia N. Beauchamp, aged 30, a native of Iowa; both residents of Los Angeles.

William McKay, aged 22, a native of Indiana, and Maude L. Jordan, aged 21, a native of Kansas; both residents of Los Angeles.

Joseph W. Wright, aged 35, and Sallie R. Light, aged 19; both natives of Virginia and residents of Whittier.

George R. Batson, aged 30, native of North Carolina, and Maude D. Stanley, aged 27, a native of Georgia; both residents of Los Angeles.

Robert Purritt, aged 23, a native of England, and Cricket Dolton, aged 29, a native of Indian Territory; both residents of Los Angeles.

DEATH RECORD.

APPLE—Mrs. Nancy Elizabeth Apple, aged 59 years, wife of J. P. Apple, 818 West Third street, departed this life Wednesday, April 9, at 4 p.m. Death resulted from a stroke of paralysis within six hours after the first attack. She was a loving and devoted wife, the friend of all, and to all who knew her.

Funeral services at 2:30 p.m., at Seventh Day Adventist Church, No. 211 Commercial. Burial in Los Angeles, April 9, of pneumonia, Albert L., son of Edward and Leonora O'Brien, aged 4 years, 4 months and 27 days. San Francisco papers copy.

BEVINS—Capt. George W. Bevin, a prominent citizen and banker of Cedar Rapids, Iowa, passed away at his cottage in Ocean Park, Cal., at 1:30 o'clock Wednesday morning, April 9, 1936. Interment at Cedar Rapids, Iowa.

UNION-LABOR DESPERATION.

General Strike is Ordered on "Unfair" Jobs.

Attempt to Force Discharge of All Non-Union Men.

Agitation Threatens Bloodshed—Contractors Prepared to Withstand Demands.

Eager for the struggle for "recognition" of union-labor organizations, which had been planned for May 1, the Building Trades Council yesterday ordered strikes on all jobs in Los Angeles where non-union and union men have been employed side by side, and at 5 o'clock last evening it was estimated by a union man that 200 men had left their positions. It is expected that the strike will spread today and that probably 300 additional members of unions will refuse to go to work where employment is given to non-union men. These estimates, however, by some contractors, who say the total will not exceed 500 men.

"We will unionize this job or there will be bloodshed," was the order of a walking delegate who had made an unsuccessful attempt to prevent non-union men from going to work on the Bryson building, and he fortified his statement by showing an order that had been issued by the Building Trades Council, calling on all union men to leave jobs where non-union men are employed.

With 1000 men on strike, the central organization of labor unions hopes to force the discharge of all non-union men and thus to unionize jobs that heretofore have been open to all workmen without discrimination as to their affiliations. Failing in this attempt, it is said the general strike of all union men will be called May 1, as had been contemplated, in which event the building trades council would order men to leave their jobs and enter into a protracted struggle for control of the labor market.

WIREMEN FORCE STRIKE.

The present strike is due to the independent stand taken by contractors in the conduct of their business, and was precipitated by the strike of union wiremen last week, when 125 men left their positions because they were not satisfied with a set of working rules prepared by their employers. The strike of the wiremen practically was lost when it began, owing to the fact that the employing contractors had formed a union of their own, and were prepared to continue business without the aid of union men. Non-union wiremen were sent out on various jobs where union men were employed, and on these jobs the walking delegates of the Building Trades Council ordered men wearing the "totes" to leave work.

The lack of unanimity with which these orders were heeded, together with the evident intention of all contractors to proceed with non-union forces, brought the matter up at a meeting of the Building Trades Council Thursday night, and Walter Gilley, "business agent" of the Council was ordered to issue the following notice to union men: "All union men who are working on jobs in this city with men who do not carry B.T.C. (Building Trades Council) cards, are requested to leave their jobs and leave the job immediately. By order B.T.C."

This order was spread industriously yesterday by numerous walking delegates and was obeyed quite generally by men who wear the union collar—reluctantly in many instances, however, as a large number of men in the unions have their hearts in their work rather than in following the whims of agitators, and they disliked to leave positions where conditions were acceptable to them in every way. Today the agitators will continue to spread the order among men on outlying jobs, and by tonight, which is expected, they will have been served on all men affected.

EXTENT OF MOVEMENT.

As a matter of fact, few important jobs are included in the strike order, owing to the preparation which con-

tractors had made for just such an event. The two most important building operations in the business center—the Johnson building at Fourth and Broadway, and the Bryson building at Spring and Second streets—are being carried on by non-union men. Many other operations are in prospect, including the Chamber of Commerce building at Main and Broadway, the Huntington building at Sixth and Main streets, but work at these places has not reached a stage where the question is involved.

The majority of jobs affected are on residences and small business blocks throughout the city, on each of which a small number of union men have been employed with non-union workmen. Jobs are not affected where union or non-union men are employed exclusively, so that the strike is not so far-reaching as might be thought at first blush.

Seventeen union carpenters employed by Contractors Smith & Wilson on the construction of the grand stand at the grounds of the Pacific National Baseball League, corner Grand avenue and Washington streets, obeyed these orders, immediately violating an agreement made two weeks ago, whereby the men were to remain at work under a non-union foreman, Mr. Wilson, until yesterday that he is determined to go ahead with the work independent of the unions, and today a crew of five men was engaged in the event of an emergency, will complete the job.

A curious condition prevails at the Bryson block, where a force of non-union men is at work under a union foreman. Members of the Carpenters' Union struck at that place Tuesday because non-union wiremen were engaged in stringing electric circuits. The John Bryson, owner of the building, immediately issued a "ded," in which he said he would tip up the work indefinitely rather than employ another union man, and Contractor Redman was instructed to recruit an independent crew. At a meeting of the carpenters Thursday night they decided to return to work and were prepared to do so yesterday morning, when the order was given to non-union men.

Ever since the declaration of hostilities at the Bryson building, the place has been beset by agitators bent on keeping men from going to work. In two or three instances, members of this party have been handling out without gloves by Isaac Bryson, son of the owner. Whenever Mr. Bryson has found a pestering agitator in the building he has thrown the man out using force when necessary.

BLOODSHED THREATENED.

One loud-mouthed breeder of discord yesterday announced to Contractor Redman that "we will unionize this job or there will be bloodshed." Whether or not this represents the feelings of union men generally, it clearly is the intention of the agitators to stir their dupes to a frenzy.

Leaders of the trouble are desperate because they have failed to have their attempts to dictate the manner in which contractors shall conduct their affairs, and those with anarchistic inclinations are willing to stir a riot in a last effort to gain their points.

At the headquarters of the Builders' Exchange there is evidence of assurance that the general contractors of the city do not fear any action that may be taken by labor organizations. The principal contractors are members of the Master Builders' Association and are banded closely for mutual protection, and employers of men in the various trades have similar organizations, notable among which are the Master Plumbers' Association, the Electrical Contractors' Association and the Master Sheet-metal Workers' Association. Strikes are now on among electricians, plumbers and sheet-metal workers, but the employers, through their organizations, have won out in every instance, and like other men are employed in the principal shops in all these trades.

A sharp thorn in the side of the Builders' Exchange Council is the fact that union bricklayers will not join the council and assist in the farcical fight for "recognition." Members of the Bricklayers' Association have willingly on every job in the city, union or non-union. They are content with their wages and are glad to be free from the annoyances caused by men of the Gray-Biddle-Hay stripe. All attempts to induce these contented workers to join in strikes have been futile and have only intensified the chagrin of the agitators.

Why the Buck Elk Has no Horns to Show.

Five elk arrived at Chutes Park yesterday, and were ensconced in the zoo. They were shipped from the northern part of the State of Washington a month ago, and were most of the time on the water. Despite the long and arduous journey in the hold of a ship and in cattle cars, they are all in first-class condition.

This is the first time that elk have been shown south of San Francisco, and, of course, their exhibition here is an experiment. The summer months will decide, no doubt, whether they can endure the Southern California climate.

There are in the band one buck and four cows, all of them young. The buck, which is fifteen hands high, will grow six inches before he reaches maturity, and the cows are capable of great growth. They are all tame, although they have been in captivity less than two months.

It will be noticed that the buck, which is in the background, is lacking the horns which are such picturesque and inevitable adjuncts to the geographies of one of the noblest four-footed animals of North America. This is because he was born in the kind, shed his antlers last fall, and in a few months will have a pair that will loom up like the branches of a gnarled oak.

The animal expert at the Chutes zoo says that he is going to hitch the two smaller cows up, as they do in Alaska, and train them to harness. This scheme may be a money-maker also, about Christmas time. The handsome pair of brown deer, which undoubtedly will grow six inches before he reaches maturity, and the cows are capable of great growth.

SHORT THUMB, LONG FINGER.

Queer Identification of Bg Highway Robber.

Ventured in Court to Testify for His Companion.

Victim and Deputy Sheriff Spotted Him by Peculiarities of Hand.

I. F. McDonald, if that is his true name, got the jar of his life yesterday when he walked into the Police Court to appear as a witness in the highway robbery case against his friend, Joe McNulty.

When McNulty was arrested, and charged with robbing an old soldier named F. C. Lyon, several weeks ago, Lyon said there were two of the robbers, and he minutely described the one who had not been arrested. He called him the "big fellow," and said he had a peculiar, long hand, and that he would weigh probably 200 pounds.

When the witnesses and others were gathered in the Police Court yesterday for the examination of McNulty, who had been brought down from the County Jail by Deputy Franklin, both Lyon and Franklin were watching the crowd. McDonald no sooner hove in sight than Lyon identified him as the "big fellow," whose description he had given the officers, and at almost the same moment Franklin had "spotted" him from that description. The latter at once picked him from the crowd, and told him he was wanted.

An examination of the hand of McDonald showed that his thumb was abnormally short and his fingers long, making a hand so peculiar that it was apparent to the officers who looked at it that he at least fitted closely with the description given of the accomplice of McNulty. He got quite red in the face and the perspiration stood on his forehead, but he tried hard to look undisturbed.

He went over to where Lyon sat, and said to him, "You're mistaken, old man; it wasn't me you saw there that night." Lyon, however, persisted in his belief that McDonald was the man wanted, and his name was substituted for "John Doe," who appeared there as the accomplice of McNulty.

The examination then went over until Monday, when both were removed to the County Jail until that time. McDonald was asked if he desired to have a witness summoned, and he replied that he did not need any, and seemed to feel confident that he could easily prove an alibi.

McNulty has big, shifty, gray eyes, and constantly makes him look like a hunted man, and he is the ideal picture of a crook. If McDonald is a close friend of McNulty, he would be safe to bet he is not an immaculate angel.

KNIGHTS OF EMMET WOULD FREE IRIN.

ANGELENO'S BOOM MOVEMENT FOR IRISH REPUBLIC.

Occasion of One Hundred and Twenty-fifth Birthday of Robert Emmet, Taken for Arousing Interest in Irish Nationalization.

Ireland, a republic and an independent nation—the dream of Robert Emmet, and the heart's desire of hosts of sons of Erin, whether at home or abroad—that is the sentiment which is promulgated anew by Los Angeles Irishmen.

They have taken the occasion of the 125th anniversary of the birth of Robert Emmet to make a public declaration of the principles and policy for which they stand.

For an Irish republic, these Knights of Robert Emmet pledge themselves to contend with heart and hand. They declare the Irish race must not, and will not give up the right for the establishment of an Irish republic, and that the Irish people can never be content to remain a part of the British empire.

In the great interest taken in the revival of the Gaelic language, and the study of the island's history, the society sees a manifest revival of the national spirit, which was inspired by the teachings and example of Tone, Emmet and Fitzgerald. Never in this generation, declare the Los Angeles Knights, has the Irish national and militant spirit, both in Ireland and among Irish men in America, been so aroused as today.

The British empire, they declare, has entered on the downward path, leading to final dismemberment, and they give old England a thrust in the ribs by declaring that "she now puts on the mask of friendship for America, so as to enable her to fling American territory under false pretenses, and to

destroy the Monroe doctrine while pretending to uphold it."

After detailing their belief that Ireland's demand for nationhood is approved by the American people, and that she will never barter her inalienable right for any half measure or for tardy redress of grievances, they declare that "The race at home and abroad must steadily prepare for the opportunity (and make it, if they can,) to strike the final blow that will make Ireland a nation among nations."

Another enthusiastic meeting of the Knights was held last night, and they purpose proclaiming their position and making the movement one that will count much for Irish nationalization. "Erin slainte Gael go bragh."

PRESIDENT RIPLEY IN LOS ANGELES.

HEAD OF SANTA FE ROAD WITH US ONCE AGAIN.

Southern California Golf Links Have Great Attraction for the Magnate—His Coming Adds to Gayety of Steam-Electric Railway War.

President E. P. Ripley of the Santa Fe Railroad is in town. He arrived at the Van Nuys Hotel yesterday, direct from Chicago. Ordinarily the coming of President Ripley to Southern California creates no surprise, for he is very partial to Southern California climate, and he finds the golf links hereabouts very attractive.

Mr. Ripley dotes on the ancient and honorable game. Although an exceedingly industrious and hard-headed Yankee business man, Magnate Ripley keeps up an intimate acquaintance with Col. Boggs, and he likes to steal away from business cares a few hours each day to knock the gutta-percha ball over a ten-acre field as well as any foot man to the major born.

After spending a good part of the winter on the links at Santa Barbara, Mr. Ripley is with us once again. Ordinarily he has returned to California to attend the wedding of his son. It is quite natural that he should wish to be among those present at that happy event, but there is a ground for suspicion that Mr. Ripley has in view more than this single object, in favoring Los Angeles with his presence at this particular time. There is golf, to be sure, to receive some attention from him while here, and the blanket street-car franchise may have just a little to do with his appearance here at a most critical period in transportation affairs in this community.

Henry E. Huntington has been generous enough to abrogate the Santa Fe from suspicion of being a party to the steam railroad combine to throttle the Huntington-Hellman suburban electric railway interests, but the presence of Mr. Ripley during the heat of the franchise fight is calculated to add to the gayety of the occasion. It may be depended upon that President Ripley will not be the least-interested spectator, even if it should develop that he does not have an active part to play in the fray. Santa Fe interests will be well looked after, with President Ripley, Vice-President Kendrick and other officials of the company in the city.

With President Harriman of the Espee represented by the fox W. F. Bierin and lesser lights of the octopus's law and politics departments, and Senator Clark's representatives here looking after the Santa Fe, the Santa Fe needs some of its head officials here to watch the other fellows.

President Ripley denied himself to interviewers last night, so his opinion on the local railway situation could not be ascertained. He would not even consent to be interviewed on the subject of golf or climate, so it must be inferred that weighty matters monopolize his time.

FORTUNE IN HAT BOX.

How Two Hundred Thousand Dollars Worth of Jewels Were Taken from New York to Newport.

[BY THE ASSOCIATED PRESS.—A.] NEWPORT (R. I.) April 10.—In a pasteboard box that appeared to contain nothing more valuable than a hat, the \$200,000 worth of jewels which has been presented to Miss Cathleen Neilson as wedding gifts, have been brought here from New York. The package was under the care of Chief of Police Richards of Newport.

Reginald Vanderbilt went to Vieckford and met the party, which was driven rapidly to the Aqueduct Bank, where the jewels were placed in a safe deposit vault.

In the vault the box was opened to afford Mr. Vanderbilt an opportunity to inspect the jewels.

MAN AND WIFE MISSING.

DENVER (Colo.) April 10.—A special from Moorcroft, N.Y., is running high over the mysterious disappearance of John W. Church and wife, formerly in the Irish general offices of the Omaha, but who has a ranch fifty miles south of Gillette. They were last seen on the morning of March 15 by W. C. Clifton at the ranch. Church's mother has been here to meet him since April 1, and is nearly distracted. Large parties have gone in search of the missing couple. Pending investigation Clifton is being held.

BICYCLIST HELD UP HAD JUST ONE CENT.

FOR the first time since the long series of highway robberies began in Los Angeles, a wheelman has been held up, but the result was not such as to encourage other robbers to devote their attention to bicyclists, to the exclusion of pedestrians. At 9:25 o'clock last night two men, unmasked, seized a young man, whom they were riding along the streets and searched him, but got no money.

The victim is Earl V. Musselwhite of 1200 Trenton street, and the scene of the robbery was near the corner of Jefferson and Figueroa streets. Musselwhite is a student, and after visiting the house of a friend in the extreme southern portion of the city, was returning home. He was riding north on Figueroa street at a slow speed when suddenly two men sprang from the curb, grasped his wheel by

Y. M. C. A. HAS SOLD BLOCK.

Big Deal Was Accomplished Yesterday Afternoon.

The Property Will Be Improved By Loan and Trust Company.

Association Will Build New and Up-to-Date Home at Once.

It can be definitely announced this morning that the Young Men's Christian Association of Los Angeles will in the near future move into a new and more commodious home. The sale of its present property at No. 209 South Broadway was effected yesterday.

The purchaser is a syndicate headed by Byron Erkenbrecher. His associates are understood to be members of the Protective Savings Mutual Building and Loan Association, of which Fred K. Rule is president. Byron Erkenbrecher, vice-president; W. G. Blewett, secretary and general manager; W. F. Morphy, second vice-president and assistant secretary.

The consideration is approximately \$175,000, which is the equivalent of \$2500 per front foot, including improvements. The lot is 70 feet front by 145 feet deep. It is improved by a four-story brick and stone building, covering about two-thirds of the lot and a one-story annex in the rear, containing the Y.M.C.A. baths and lockers, and occupying the remainder of the ground.

There is an incumbrance of a little less than \$50,000 on the property, which the purchasers will assume. The remainder will be paid in cash, and with the proceeds the trustees of the association will purchase a new site and proceed with the erection of a new building commensurate with the Y.M.C.A.'s growing needs.

The present Y.M.C.A. building was erected in 1887, when the membership of the organization in this city was comparatively small. The debt created by the purchase of the site and the construction of the edifice proved a heavy burden and the association came near losing the property on several occasions through foreclosure of mortgage, but friends came to the rescue each time, and tide over the trouble. Eventually the membership expanded and the financial condition of the organization improved so that the major part of the debt was wiped out. But in the mean time the association had outgrown its quarters, and the need of more room had become imperative if the good work carried on by the institution was to be continued.

It was at first proposed to enlarge the present building, but the conclusion was reached that it would be better to sell the property and use part of the proceeds to buy a lot less valuable for business purposes, but yet centrally located, and which would suit the purposes of the association as well, if not better, than the present location. It is figured that a suitable lot can be purchased for about third or one-fourth the price per front foot received for the old site, and the remainder of the proceeds forms the nucleus of a building fund to be raised by private subscription. To this end a Citizens' Committee was appointed to act in concert with the trustees of the Y.M.C.A. State General Secretary Sutherland is here to personally conduct the campaign, and an active and systematic canvass for subscriptions has been commenced, with flattering prospects of success in raising a large enough fund to erect a building costing several hundred thousand dollars.

The old building, as soon as the Y.M.C.A. moves out, which will be as soon as new quarters are provided, will be remodeled and converted into an up-to-date office building. The location, being on Broadway, just below Second street, adjoining the American National Bank on the south, is an ideal one for such a purpose. It is probable that the building will be raised several stories and extended over the entire lot, thus forming one of the largest structures of the kind on Broadway.

It is said to be the purpose of the Protective Savings Mutual Building and Loan Association to enlarge its sphere and move into the new quarters as soon as remodeled. It is understood to be the purpose of the concern to do a regular trust and banking business. Its present offices are in the Tajo building, at the corner of First street and Broadway.

E. A. Forrester & Son are agents of the Y.M.C.A. for the sale of the building. Negotiations had been pending for several days and were brought to a focus yesterday.

AT NEW YORK HOTELS.

NEW YORK, April 10.—[Exclusive Dispatch.] At the Fifth avenue, B. K. Douglas, T. A. Douglas, Miss M. L. Douglas, Mrs. A. Douglas; at the Metropolitan, C. P. Bartlett and wife.

Great Expectations.

Her former mistress (admirably!) He certainly is a bright baby. Norah, I expect he will make his mark some day.

Mrs. Muleaughy (fondly!) Sue, mam, an' we expect he'll be able to do more than his mark—we want him to be able to write his name.—[New York Times.]

SIX STORIES ON MAIN.

The New Brick Block That Is to Be Built by Mr. A. P. Johnson.

Plans have been made by Architect R. B. Young for a new brick block to be built on Main street, next south to Hotel Rosilyn, by A. P. Johnson. It will be six stories high and an ornament to the street. The stores have already been leased and work will be commenced at once.

BIBLE LESSONS.

FOR SUNDAY-SCHOOL TEACHERS AND OTHER BIBLE STUDENTS.

Prepared for The Times by J. S. Kirtley.

For Sunday, April 12, 1936

I Cor. xv. 20-21. 52-53. "The Resurrection."

THE CONNECTION.

We have already had two lessons from the letter which Paul wrote to the Corinthians from Ephesus. Today we have another, and it is about the resurrection. All this chapter speaks of that subject and is an attempt to meet an error that the heathen held and that had been brought with the Corinthian Christians. He arrays the historical proofs of Christ's resurrection and also shows that all other Christian doctrines and hopes and duties are connected with and dependent on the resurrection of Christ. The proof is cumulative, comprehensive and convincing—the testimony of eye-witnesses, so many, so unselfish, so independent, so simple and clear; the testimony of Paul's conversion and experience; the testimony of Christ's enemies, their actions and words. All Paul's preaching was based on the resurrection, all his honor was involved in it; all his power to conquer sin and death and win heaven came from it.

THE LESSON.

"Our Resurrection Assured." (Verses 20-21.)
20. But now hath Christ been raised from the dead, the first fruits of them that are asleep.
21. For since by man came death, by man came also the resurrection of the dead.

These verses deal with the Christians' hopes and prospects as they are involved in Christ's resurrection. The proof of it is all in the joyful assurance is given that therefore we shall rise from the dead—and all rise through Christ. The reason of it is that we are vitally connected with Christ so that whatever He has we shall have, whatever He is we shall be. Paul gives a vivid illustration and then a reasoned statement of it.
(1.) The illustration is that of a harvest. Whenever the husbandmen found the first ripe fruits and brought them in the joy of the harvesters began for the "first fruits" meant that the rest of the harvest would follow and would be of the same kind. When Jesus arose from the grave heaven's joy began, because He was the first fruits giving assurance that His people would follow in the right order and time, and fill the garner of the Great Husbandman, and that they would be like Him, their bodies to become like His "glorified body." The connection of His people with Him is vital and their resurrection is assured.
(2.) The reasoned statement is that, as all shared the nature of the first man, Adam, all participated in his death, and, as all are affected by Christ, all shall be again. Subsequent verses and other teachings inform us that

one of the things that He has revealed—a mystery now cleared up. That which will decay into corruption cannot go into a world where there is no decay, or where there is incorruption. Those who are dead shall thus arise.

(2.) The bodies of those who are living will be changed instantaneously. The word translated means an atom and nothing can even be imagined smaller than the atom. The work for twinkling means a stroke and a stroke falls in a flash. The change will give resurrected bodies to exist in an eternal life. In First Thessalonians, 4, 16, the coming of Christ is more fully described. The trumpet has been long present and it will announce the great day of Christ's final coming.

(4.) This resurrection of the dead and change of the living will be fulfillment of its scripture, a "raising of the dead," the "farthest reaching" of all Old Testament prophecies. (5.) This new spiritual body will not only be incapable of decay, or corruption, as our present bodies, but it will be immortal. No end will ever come to it. It will be the "eternal years of God" belong to it.

(6.) In this resurrection, death is destroyed. Paul's restoration to life, refers to Israel's restoration as a resurrection. Paul carries the idea further and sets forth man as conquering death in Christ's resurrection. He will be at last swallowed up; if a deadly serpent whose sting is sin, the sting is extracted, because it was buried in Christ and left there; if sin derives its power from the law, because the law is forbidden; sin stimulates a desire for it, and by showing the perfect, sinless one, reveals the true character of it, Christ has fulfilled the law in his life and death and given us the weapon to fight sin with.

(7.) The prospect of the resurrection and all that is involved in it is a present power in the life. It is a joy in itself to know that what we do will survive. It awakens our gratitude to think that God gives us so much through Christ. It inspires our about of victory as it gives us the thrill of victory in advance. Well may Paul pray that he may know Christ "and the power of His resurrection."

III. "The Resurrection a Present Power." (Verses 54-55.)

"54. Wherefore my beloved brethren, be steadfast, immovable, always abounding with the work of the Lord, for as much as ye know that your labor is not in vain in the Lord." The word "wherefore" shows the connection between the truths He had revealed to them and the duty He now urges upon them. Because they are to be raised with Christ and be like Him and be like Him, they are to be as He was, in the days of His life on earth. All this hope is to be kept in their hearts and those prospects attractive by their fidelity to their present duties. It is right to take advantage of the enthusiasm to enjoy these humble duties. The

first duty is the steadfast—a permanent—seated—faith in all this truth maintained against all the arguments of the world, the flesh and the devil. The next duty is to remain unmoved in the face of worldly or adverse influences. The final positive duty of active propagation of these truths in an effort to bring men under their power is enjoined. In all this he cheers them with the joyous hope that no labor is in vain.

WHAT THE MASTERS SAY.

We are to rise with Him to newness of life. Sometimes in weariness or dejection, one feels as if he had seen the best of everything, experienced all he can experience, and must now exist in a thoroughgoing, it closes with the twelfth, it is not because he has not begun it.—Dods.

When I go down to the grave I can say, like so many others, "I have finished my day's work," but I cannot say, "I have finished my life." My work will begin again next morning. My tomb is not a blind alley. It is a thoroughgoing, it closes with the twelfth, it is not because he has not begun it.—Dods.

Through union with Him each of us may possess His immortal risen life, in which death the conqueror is himself engulfed. Death, the conqueror, is conquered utterly and forever. Death, the serpent, has his sting drawn and his life is made up. It is because Christ lived and taught on earth that we know that we may live in heaven. Without God, man is without hope in any world.

Christ's raising is still lifting the world.

Jesus taught nothing that had not a direct reference to this present life. He was the most practical of teachers. This truth of the resurrection is linked to the here and now. Because we shall live in heaven, we should live a heavenly existence here; because we have been raised together with Christ, we are bound to manifest His risen life in our thoughts and actions. The resurrection truth puts power and dignity and beauty into every day.

One of our great needs has been declared that "The resurrection of Jesus is the best-attested fact in history." The extent and variety and weight of other's thought, as Cardinal Gibbons expresses it, "Renaissance that the appearance of Jesus after His death was only an illusion of the overpowered resurrection, but in vain. They succeeded only in overthrowing one another's arguments. Thus the two greatest of them, Renan and Strauss, 'cut each other's throats.' As Cardinal Gibbons expresses it, Renan says that the appearance of Jesus after His death was only an illusion of the overpowered resurrection, but in vain. They succeeded only in overthrowing one another's arguments. Thus the two greatest of them, Renan and Strauss, 'cut each other's throats.' As Cardinal Gibbons expresses it, Renan says that the appearance of Jesus after His death was only an illusion of the overpowered resurrection, but in vain. They succeeded only in overthrowing one another's arguments. Thus the two greatest of them, Renan and Strauss, 'cut each other's throats.' As Cardinal Gibbons expresses it, Renan says that the appearance of Jesus after His death was only an illusion of the overpowered resurrection, but in vain.
